

By what possible logic can the NAB with petition 04-160 be using to control or limit another commercial enterprise, just because it uses a different technology to broadcast "local interest" information such as weather and news. I thought that any information such as this could be observable by anyone and that no one had the right to prevent anyone else from broadcasting factual "public domain" information. No one OWNS the weather or what is happening out in the real world. Please don't let money be the factor that determines who has the right to exercise their liberties provided under the United States Constitution to the right of free speech.
